Optional Workstation Accessories

These optional Accessories are available to enhance your Workstation and to meet your individual system and office requirements. Ergotron Workstation Accessories include:

- Keyboard Holder
- Task Lights
- Acoustical Panels
- Replacement Cables
- Power Strips
- Surge & EMI Suppressors
- Extended CPU Shelves
- Casters/Glides
- Aux. Printer/CPU Shelves
- Custom Worksurface*
- Others

*Design Station Base Only

The Ergotron Design StationTM

Bring the Desktop back to Desktop Publishing and Computer Aided Design!

The Ergotron Design Station brings the Desktop back to Computer Aided Design and Desktop Publishing by combining the best features of traditional Drafting/Design furniture with modern ergonomics and space optimization.

The automation of Design/Engineering and Publishing have separated the designer from the designers worksurface. What was once done manually at one station now is most often done at multiple stations. This is inconvenient, reduces productivity, and drastically increases space requirements. The Ergotron Design Station provides an ideal solution to this problem.

The Ergotron Design Station's innovative design integrates the Computer, CRT Monitor(s), and Worksurface into a compact, self-contained station which provides *the most ergonomically adjustable work environment yet devised*. The operator can directly interact between the CRT Screen(s) and the drawings instead of constantly moving between the CRT Screen(s) and a separate drawing layout area. Unnecessary physical movements are eliminated resulting in improved operator concentration, fewer errors, and dramatically increased productivity.

The Design Station, available in both sitting and standing heights, suspends the CPU, Peripherals, and single or multiple Monitors above an adjustable, laminate Drafting Table. Drawings, blue prints, and page layouts can be edited on the computer with hardcopy documents and system control devices conveniently located on the worksurface below. For those users who require use of large Digitizer Boards, framing may be ordered in lieu of the worksurface.

For environments already equipped with desks, drafting tables, or stand mounted digitizer boards, the Desk Attachable, Free Standing or Wall Mount Workstations allow the operator to combine the existing surface with state-of-the-art adjustability and space savings.

Major components of the Design Station include:

- Structural Frame - Available in 30" and 42" widths, 70" and 78" high.
- CPU/Peripheral Shelf - Mounts Computer and Peripherals, suspends Arm and/or Truck Assemblies.
- Radial Arm Assembly - Designed to mount CRT Monitors weighing from 17-70 lbs. Provides lateral movement under shelf, vertical adjustment of CRT, fore and aft adjustment, tilt/swivel, and park.
- CRT Suspension Truck Assembly - Designed to manage CRT Monitors weighing from 60-120 lbs. Provides lateral movement under shelf, tilt/swivel. Vertical adjustment of CRT provided by slots in Frame.
- Adjustable Worksurface - Rear of surface adjustable in 2 1/2" increments, front is infinitely adjustable.
- Mobile Leg Assembly - 5 Casters provide complete mobility and can be locked for stability during use.

Design Station/Workstation Frame configurations:

<u>Workstation</u>	<u>Available Sizes</u>	<u>Worksurface Options</u>
Design Station	30" W x 70" H	30" x 42" or 36" x 54"
